

Serial No. 10/695,695

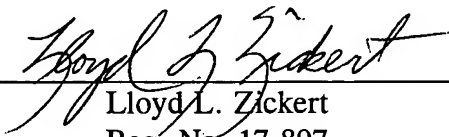

REMARKS

This Corrected Second Preliminary Amendment adds a paragraph on page 1 of the specification concerning the related parent application. It also updates the status of the applications mentioned on pages 14 and 16 of the specification to reflect the patents issuing from those applications. This Corrected Second Preliminary Amendment now includes the text of pending Claims 15-17 and 24 in addition to the text of new Claim 25.

New Claim 25 is also added in order to give Applicant adequate protection on the invention. It is submitted that this claim is patentable over the prior art and that it only differs from issued Claim 19 in the parent '468 patent with respect to the definition of the opening as set forth in the last lines of the claim. It is believed that Applicant is entitled to this claim because it is fully supported by the disclosure and does not constitute the addition of new matter.

An earnest endeavor has been made to place this application in better condition for allowance, and such action is courteously solicited.

Respectfully submitted,

Lloyd L. Zickert
Reg. No. 17,807
